

Interactive Training for Professional Phraseology

PRACTICE THE LANGUAGE OF SAFETY

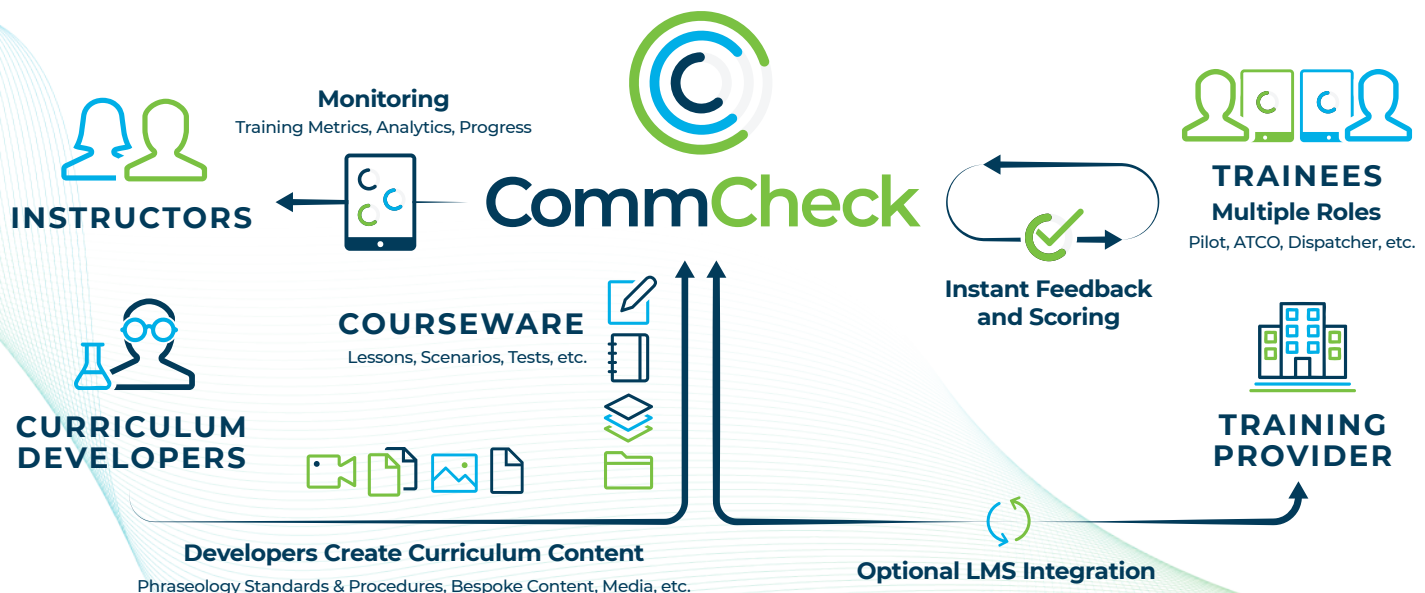

The Problem with Traditional Training

In aviation, maritime, emergency services, and other safety-critical professions, communication is a structured, high-stakes discipline. Yet most training programs treat this critical skill as a passive, book-based exercise that leaves trainees underprepared when they start using live radios. For non-native English speakers, the road to proficiency is even longer.

A Better Way

CommCheck™ transforms passive phraseology training into active, speech-interactive practice. Built on ASTI's decades of simulation experience, trainees build fluency through repetition, real-time feedback, and graduated complexity before they ever key a live radio.

CORE CAPABILITIES

CALL-AND-RESPONSE TRAINING

Engages the cognitive and motor pathways used in real operations

MULTIMEDIA PROMPTS

Combines text, imagery, video, and audio for rich operational context

CURRICULUM DEVELOPER CONTROL

Fully customizable learning paths, scenarios, and localized content

SCALABLE PRACTICE

Unlimited repetition with no instructor overhead

PERFORMANCE ANALYTICS

Tracks progress and identifies gaps

CLOUD-BASED ACCESS

Train from any browser-enabled device, anytime, anywhere

THE COMMCHECK ADVANTAGE

ENHANCED SAFETY

Build phraseology proficiency in a consequence-free environment before it really counts.

REDUCED COSTS

Offload foundational skill development to self-paced practice, cutting simulator and instructor hours.

OPTIMIZED TRAINING

Students arrive at advanced training ready to focus on judgment and decision-making, not basic radio technique.

BEYOND AVIATION

CommCheck's flexible framework extends to any profession requiring structured verbal communication—maritime, emergency dispatch, medical handoffs, military, and more.
